

How to Update Self for Final - SCM&PE

Dear Student Friends,

How to update ourselves is a very common question asked by the students, before their examination.

Hence, I thought of writing this article for you. It will guide you about how to do the necessary updations.

First of all, let me tell you what is available on our website : www.CaRakeshAgrawal.in

Particulars	PDF Notes	Video Lectures
Amendment Batch 1	Available - Free download	Available - MRP ₹ 500
Amendment Batch 2	Available - Free download	Available - MRP ₹ 400
Amendment Batch 3	Available - Free download	Available - Free on YouTube
Amendment Batch 4	Available - Free download	Not Available at present

- A student of Version 1 Regular batch should do all the above amendment batches for updations till date.
- A student of Version 2 Regular batch should do amendment batch 2, 3 & 4 for updations till date.
- A student of Version 3 Regular batch should do only amendment batch 3 & 4 for updations till date.
- In addition to the amendment batches, I keep of posting 'Exam Paper Analysis' and general guidance about exams on our website and sometimes on YouTube channel also.
- We have designed a product called "SCM&PE - Quick Revision Batch". It will help you to quickly revise the whole syllabus, in case if you have forgotten it. This product is also available for sale on our website : www.CaRakeshAgrawal.in
- You may yourself prepare the brief 'Summary Notes' at the time of your first time study. These will be useful to you for revision purpose.
- In addition to all the above, all the students (of any version), should also refer the "Case Study Digest" issued by ICAI recently. As it is issued recently by ICAI, it was not covered in any of the earlier versions recorded in the classroom. The PDF notes are available free of cost on our website under 'Student Corner' section. If you want, then video lectures of 'Case Study Digest' are also available on our website for sale at a nominal price.
- I think, this will be more than enough for updation as well as revision purpose.

Best of Luck !
